- Appreciation Letter

We are happy to state that M/s Premier LPG Ltd is our industrial LPG supplier and earlier we were using diesel as fuel in our furnaces and got in touch with their company, they offered to convert our diesel furnace to LPG with total solutions and we got into a contract with them. We not only have saved above 40% on our fuel bill but our pollution levels have also come into permissible limit as LPG is a cleaner fuel allowed by the govt. We are very satisfied and content with their dealings and cannot think of anybody else as our LPG service provider. Wishing them a great future.

Yours Truly,

For M/s speedways

Atul Ahuja

Director
